## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 28 – 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 28, the applicant claims an unregistered character graphic and a character graphics. It is unclear if the terms are intended to be synonymous terms or if there are in fact 2 different types of character graphics. Clarification and/or correction are required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 28 – 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Timmons et al. (US 4,022,211).

With reference to claim 28, Timmons et al. (hereinafter "Timmons") discloses a method of making an absorbent article comprising providing a topsheet, providing a backsheet, and providing an absorbent core and positioning the absorbent core at least partially between the topsheet and the backsheet (col. 2, line 60 to col. 3, line 2); positioning at least one wetness indicator graphic at least partially between the backsheet and the absorbent core (col. 3, lines 41 – 46) and positioned at least one unregistered character graphic in a waist portion (col. 3, lines 41 – 56 and in figures 2, 5 and 6) of the article by a process comprising: providing a web having printed therein a repeating series of character graphics (figures 2 and 5 – 6), cutting the web at predetermined intervals (i.e. in the shape of a diaper as shown in the figures); and positioning the web in the waist portion of the absorbent article wherein the wetness indicator graphic and unregistered character graphic are related to one another, but not interactively interrelated as set forth in col. 3, lines 46 – 56 and in the figures.

Regarding claim 29, Timmons discloses a method wherein cutting the web at predetermined intervals comprises cutting the web at a length greater than the length of at least one set of character graphics in the repeating series as set forth in the figures.

As to claim 30, Timmons discloses a method wherein cutting the web at predetermined intervals results in at least one full character graphic positioned in the waist portion as set forth in the figures.

***Response to Arguments***

Applicant's arguments with respect to claims 28 – 30 are considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**.

See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
